### **Asilant 69030 COTS Graphics Driver Available**

*Xi Graphics Releases new driver in LX Accelerated-X v6 line*

DENVER ---- Xi Graphics, Inc. announced today the release of new high-performance graphics drivers for the venerable 69030 graphics chip from Asilant Technologies. (This chip was previously known as the Chips & Tech 69030). The new graphics drivers are for use with either Linux or Solaris (on Intel), and extend the performance to 24-bit color depth on displays up to 1280x1024 resolution for this chip. Both the Linux and Solaris drivers are COTS qualified by virtue of the commercial service support available from Xi Graphics. This customer support which is prompt, courteous and competent, is also free via phone and e-mail to its Denver, Colorado facility.

Accelerated-X graphics drivers from Xi Graphics are used in numerous military systems deployed around the globe, in ships, on the ground, and in wheeled and tracked vehicles. The drivers are available off-the-shelf for hundreds of desktop, laptop, SBC, and multi-head graphics hardware configurations. Licensed on a per computer basis, license prices start at \$99.95. Quantity discounts are available.

#### **About Xi Graphics, Inc.**

Xi Graphics, Inc. has developed commercial accelerated graphics drivers and X servers for the X Window System on Linux and UNIX<sup>®</sup> systems since 1994. For information on the Company, visit [www.xig.com](http://www.xig.com).
